

DM Series, 7' x 8', 50,000 CIR, Full
Range Toe Guards

DLM Overview...

- Industry Experience Since 1962
- Privately Held –“Customer Focused” Enterprise
- Extensive Application Experience
- Fully Integrated Manufacturing Facilities
- On-Site Engineering & Customer Support
- National Network of Knowledgeable Sales and Service Representatives
- Superior Structural Construction
- Accepted Nationally by Fortune 500 Companies

Since introducing the freight industry’s first Edge-of-Dock leveler in 1962, DLM has continued to provide innovative ways to improve productivity and safety at the loading dock. The DLM DM Series mechanical leveler is value engineered to meet both application and budget constraints while maximizing productivity, optimizing efficiency and improving safety. From superior structural design to unlimited operator features, the DM Series mechanical leveler is a wise investment.

DM Series Mechanical Dock Leveler

Designed, Engineered & Manufactured
in the U.S.A

DLM's continuing commitment, is to design and build the very best dock levelers our industry has to offer. A strong customer focus has facilitated the inclusion of important user features into every DM Series leveler; important features like:

Structurally Superior

- Over 29" of direct rear hinge support – heaviest in the industry.
- Four sided box construction provides unmatched structural integrity.
- Deck construction is capacity dependent to insure your loading bridge matches the demands of the facility
- Leveler lip and deck are constructed with high-strength 55,000 lb yield, safety treadplate.
- Deck support members are application dependent
 - Low Capacity - Roll form "C" channel
 - Medium Capacity - Structural "C" channel
 - Heavy Capacity - Structural "C" channel and "I" beam
- Close and consistent spacing of beams provide necessary support for 3-wheeled and 4-wheeled fork trucks (35k+CIR).

CamControl™ Counter Balance Assembly

- Multiple spring counter balance.
- Precision lifting roller and metered cam provide superb balance and easy walk down of the ramp.

The DM Series mechanical dock leveler offers desirable user features and rolled form steel deck construction. The result is a dock leveler that is safe, efficient, and cost effective.

DM Series Standard Features Include...

- | | |
|--|-------------------------------------|
| • Four Sided Box Construction - Deck Assembly | • CleanSweep Frame™ |
| • Multi-position Structural Steel Safety Legs | • Lip Drive™ Positive Lip Extension |
| • Below Dock Endloading Control | • Lockout/Tagout Maintenance Strut |
| • Extended Range, Heavy Duty Float/Hold-down Mechanism | • Night Locks/Cross Traffic Support |
| • Yieldable Lip Plate | • Lip Supporting Service Strut |
| • CamControl™ Counter Balance Assembly | • Working Range Toe Guards |
| | • Two (2) B410-14 Laminated Bumpers |

Easy Release

- Finger tip release operation via unique lever design.
- Extended range float barrel with automatic release provides unlimited float capability – an important consideration for servicing air-ride suspension trailers.

Deck & Lip Maintenance Struts

- Permanently mounted, hinged maintenance strut supports deck during maintenance or inspection.
- Maintenance strut is lockout/tagout capable.
- Lip support strut permits independent support of lip.

Lip Drive™ Positive Lip Extension

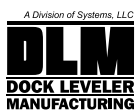

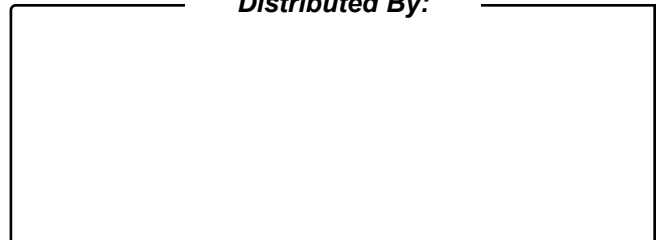

- Lip Drive provides reliable lip extension activation.
- Lip Assist spring restricts the descent of the lip until walk down is performed.
- Gas filled shock meters the descent of the lip and is reliable in all climate conditions.
- Lip mechanism is completely yieldable.

CleanSweep™ Frame

- Provides clear access to area beneath platform.
- Allows easy removal of debris.
- Ideal for food distribution facility applications or where maintaining sanitary standards is important.
