## Hydraulic Dock Leveler

25K - 40K  
CIR

6' - 7'  
WIDTH

6' - 8'  
LENGTH

### OPERATION

The DLM LHD Series leveler utilizes a hydraulic operation with push-button activation to raise the leveler and automatically extend the lip. The standard lip is 16", with an operating range of 12" above and below dock level. The platform is designed to compensate for canted truck beds up to 4" and remain flush with the dock floor.

### SAFETY FEATURES

- Externally mounted, non-adjustable velocity fuse is used to prevent free fall of the platform
- Built-in lockout/tagout maintenance inspection strut
- Full-range toe guards close off sides at the highest position
- Lip keepers for cross traffic support and automatic night lock security against theft

Fully hydraulic yieldable lip cylinder.

### VEHICLE RESTRAINTS & ACCESSORIES

For enhanced safety, we recommend all DLM levelers be equipped with light communication, iDock Controls, and vehicle restraints, which help prevent unexpected trailer departure from the loading dock.

### CONSTRUCTION

The LHD Series has proven hydraulic operation to produce a safe, reliable, yet economic hydraulic dock leveler. All DLM levelers are built with a durable four-sided box construction.

### CONNECTIVITY

Optional iDock® 2.0 Controls with online connection to myQ® Enterprise.

## LHD SERIES COMMON OPTIONS

3-wheel offset forklift protection

Custom interlocking

Dock lights

Extended lip sizes (18" and 20")

Integrated control panel

Vehicle restraint

Weather seal (brush or rubber)
