# Connectivity That Transforms Your Dock

## iDock®2.0 + myQ® Enterprise

Smarter docks. Safer operations.  
Stronger connection.

## iDock 2.0 + myQ Enterprise: Smarter Together

iDock 2.0 delivers safety, clarity, and control with its full touchscreen, animated message display, interior camera, and high-visibility LED safety bar. When paired with myQ Enterprise, every dock action is captured, tracked, and communicated to the cloud. The result is real-time visibility that helps managers spot issues instantly, optimize performance, and turn the dock into a true hub of intelligence.

## Safety. Efficiency. Strength.

Working together, iDock 2.0 and myQ Enterprise elevate dock operations to a new standard. Predictive maintenance, AI-driven scheduling, and real-time data insights prevent costly mistakes, reduce downtime, and accelerate trailer turnarounds. This connected platform keeps your operation safer, smarter, and stronger—ready to meet today's challenges and tomorrow's demands.

## myQ Dock Management: Total Control at the Dock

myQ Dock Management gives you unmatched visibility into your dock operations. From trailer flow to equipment usage, managers can monitor activity in real time through a centralized dashboard. Automated alerts, performance analytics, and integration into broader yard workflows reduce bottlenecks, extend equipment life, and enhance worker safety. It's the control and confidence you need to run a faster, more efficient warehouse.

## WHY CHOOSE iDOCK® 2.0 & myQ ENTERPRISE

IMPROVE SAFETY & AWARENESS

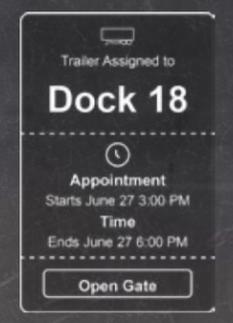

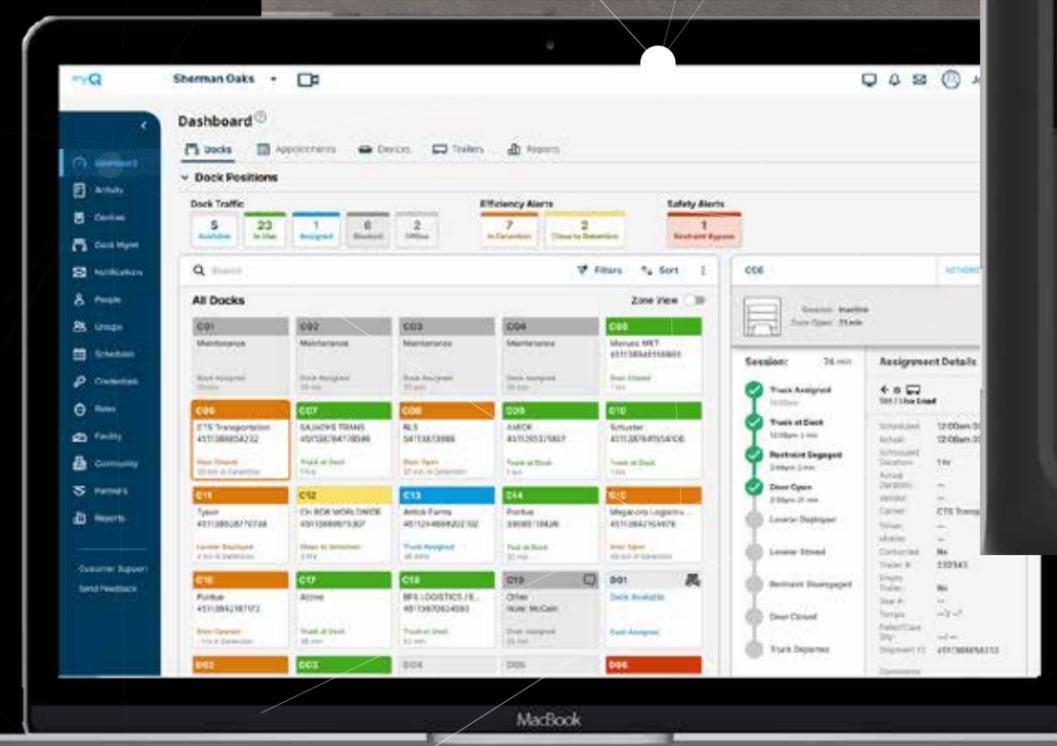

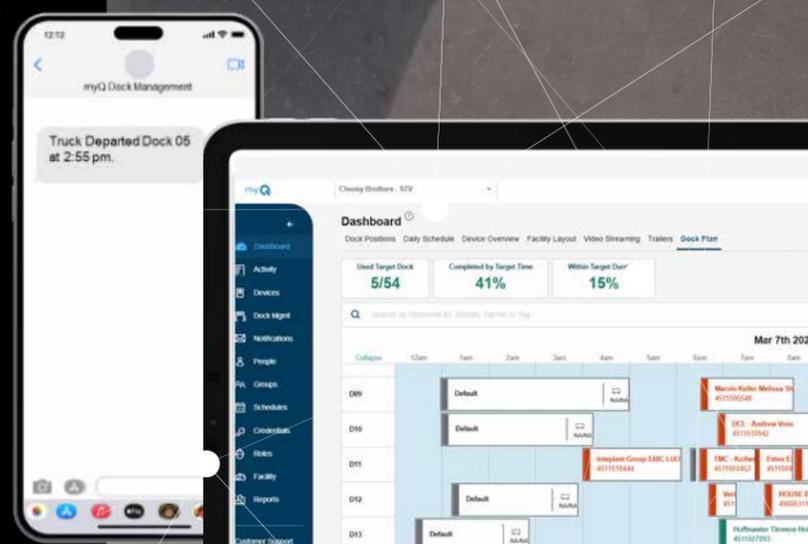

INCREASE EFFICIENCY

ELIMINATE MANUAL PROCESSES

SCALE ACROSS ANY FACILITY

ENSURE ACCOUNTABILITY WITH VIDEO & REPORTING

FUTURE-PROOF YOUR INVESTMENT

# Built for the Future of Logistics

## Access Reinvented. Safety Redefined.

### INTEGRATED VIDEO

Gain instant visibility into dock activity, so you always know who's operating and what's moving in and out of your facility.

### DYNAMIC MESSAGE SCREEN

Follow clear, step-by-step instructions on a large, animated screen that keeps every operator confident and on track.

### HIGH-VISIBILITY SAFETY BAR

Stay safer with unmistakable light cues that prevent costly mistakes and keep both people and equipment protected.

### MODULAR & UPGRADEABLE

Invest once and grow over time with a controller built to evolve with your operation's future needs.

### TWO-WAY COMMUNICATION

Connected Controllers can receive remote enhancements directly from the cloud.

### OPTIONAL WIRELESS CARD READER

Optional Card reader provides controlled, authorized access to the controller.
