

The iDock® Alert Communication System is an enhanced version of DLM's simple Dock Alert and provides a reliable warning system that establishes a clear line of communication between truck drivers and dock personnel, thereby reducing the risk of accidents at the loading dock.

iDock Alert Communication System Design Features...

- **Advanced 3-Color Light Communication System**
- **Interactive Message Display with Notifications, System Information, Maintenance History and More**
- **Raised Dome Button Design for Reliable Ease of Use**
- **Fault Code Display and Internal LED Lights for Easy Troubleshooting**
- **Optional Sensors for Counters of Equipment Usage and Dock Activity**
- **Activation of Lights Automatically with Optional Solid State Sensor**
- **Clear Red and Green Lights Provide Immediate and Recognizable Direction to Drivers and Loading Dock Staff**
- **Exterior Yellow Polypropylene Housing Will Not Rust, Pit or Corrode Like Similar Metal Units**
- **"High Visibility" Exterior Caution Signs**
- **Made in the USA**

VALUE-ENGINEERED
DOCK LEVELERS

iDock® Alert Communication System

Effective Safety Communication

As a truck approaches the dock, exterior lights will flash green while interior lights are red. Once the truck is in position, the dock attendant will open the overhead door, secure the trailer with an optional restraint, and raise the leveler onto the trailer. This action will trigger one of the installed sensors to automatically change the exterior light to red, letting the driver know not to pull away, and interior light to green, indicating that it's safe to proceed with loading/unloading.

iDock Alert is also equipped with the advanced features that iDock Controls have to offer, including an interactive message display, an adjustable 3-in-1 LED light assembly for a clear indication of the dock conditions, and dome button technology for a reliable ease of use. The message display on the controls will provide fault notifications, as well as a menu with equipment information and maintenance history.

Monitor Dock Activity

iDock Alert can have optional sensors installed at the loading dock to track equipment usage and dock activity. Using the message display on the controls, a dock attendant can view the counters from each of the installed sensors.

Technical Specifications...

Exterior Light Housing	Safety Yellow Polypropylene, UL Listed/Recognized
Power Consumption	0.8 Amps @120 Volts AC (controller) 0.06 Amps @ 120 Volts AC (LED)
Bulbs	Standard: LED
Lens Diameter	4 1/4"
Dimensions	11 3/4"H x 6 3/8"W x 3 3/4"D
Interior Control Panel	Nema4 UL Listed/Recognized
Dimensions	14"H 12"W x 8"D
Exterior Signs	Safety Yellow All Weather Plastic
Dimensions	16 7/8"H x 8"W
Shipping Weight	25 lbs.

LED Exterior Light and a set of standard mirrored image caution signs notify the truck driver.

Upgrade to iDock Controls with optional integrated equipment for a more efficient loading dock.

Designed, Engineered & Manufactured in the U.S.A.
